

chenille

Technically advanced upholstery fabrics made of chenille fibres consisted of two simple twisted-together threads, between which are another cut fibres. Owing to that - fabric has a structure similar to that of velour or plush. A typical feature of the chenille - is an irregularity of upper structure, tiny irregular clearances, and downiness.

It is a pile fabric and will flatten as a characteristic. For optimal appearance retention, regular light vacuuming or brushing with a soft brush is necessary.

SKY is part of our greencare range: 100% RECYCLED and recyclable fabrics.

Sky is made of 100% recycled waste, including upcycled cotton from garments and recycled PET from waste. Recycled PET is converted into yarns. This way we create this eco-friendly upholstery fabric. Ultimately these recycled yarns are transformed into soft, beautiful, recycled fabrics.

from PET to fabric

1 **PET bottles**
Post-consumer PET bottles are collected from the ocean by fishermen or originate from different households.

2 **Flakes**
Those used PRT bottles are sorted by color and then transformed into flakes.

3 **Pellets**
Once the flakes are sorted, they are melted to pellets.

4 **Yarn**
Next in this recycling process, these pellets are spun into yarn.

5 **Fabric**
Here is where we step in create our ecological Greencare fabrics from recycled yarn.

***Easy to clean** an easy way to remove a stain - suffice rub with a damp cloth and soapy water.

Eco friendly all materials are biodegradable, recyclable. All waste are recycled. Energy and water consumption are minimised. No toxic products during production.

Washable according to graphic instruction.

Recycled recycled materials.
