

## chenille

Technically advanced upholstery fabrics made of chenille fibres consisted of two simple twisted-together threads, between which are another cut fibres. Owing to that - fabric has a structure similar to that of velour or plush. A typical feature of the chenille - is an irregularity of upper structure, tiny irregular clearances, and downiness.

It is a pile fabric and will flatten as a characteristic. For optimal appearance retention, regular light vacuuming or brushing with a soft brush is necessary.

### STANDARD

**polyester 60%, polypropylene 25%, recycled polyester 15%**

### FLAME RETARDANT (FR)

**polyester 60%, polypropylene 25%, recycled polyester 15%**
