

HEATHER

bouclé

Bouclé is both a yarn and a fabric made from it. The yarn is made from length loops of similar size that range from tiny circlets to large curls. It is nubby fabric - to make bouclé, at least two strands are combined, with the tension on one strand being much looser than the other as being connected to its plies. Loose strands form loops; the other strand is an anchor for the previous one. Bouclé is also a name of the fabric produce from this type of yarn, especially fabric that maintains the looped appearance.

STANDARD

modacrylic 68%, polyester 29%, viscose 3%

FLAME RETARDANT (FR)

modacrylic 68%, polyester 29%, viscose 3%

standard	version	flame retardant (FR)
